As a software developer with a solid background in JavaScript, MongoDB, MySQL, HTML, CSS, and Bootstrap, I bring a versatile skill set to the table. I am particularly fond of and well-versed in front-end development and web design, and my ability to solve complex software-related problems, combined with my keen interest in UI/UX design and database management systems (DBMS), allows me to create seamless and efficient user experiences. My enthusiasm for the tech industry drives me to stay updated with the latest trends and technologies, continuously improving my skills and knowledge. Whether it's developing robust back-end solutions or crafting visually appealing front-end designs, I am passionate about delivering high-quality software that meets user needs and exceeds expectations.

Technical Skills:

- **Programming languages:** JavaScript, Python, React with Vite, PHP.
- **Agile & Project Management:** Scrum
- **Databases:** PostgreSQL, MongoDB, MySQL Workbench 8.0.
- **Version Control:** Git, GitHub.
- **UI/UX:** Wireframing, Prototyping, Figma, Framer, Adobe, Canva.

Soft Skills:

- **Enthusiastic and Open to Learning:** Embrace new challenges and actively seek opportunities to expand your knowledge.
- **Collaborative:** Engage with team members, share ideas, and listen to others to enhance creativity and problem-solving.
- **Team Work:** Contribute your skills and support colleagues to ensure projects run smoothly and efficiently.
- **Problem Solving:** Approach issues logically, identify root causes, and implement effective solutions.
- **Time Management:** Prioritise tasks and manage time efficiently to meet deadlines and deliver high-quality work.

Experience & Projects

KGL, Catalyst Project.

Duration: June 2024- September 2024

- I created an inventory management which will help a company manage its inventory on its two branches and since it required a digital solution(<https://kgl-frontend.vercel.app>)

Technologies/Tools Used:

- Visual studio, Node.js, PostgreSQL, Render, Vercel, GitHub and Vercel.

Laboremus Uganda

Role: Developer intern

Duration: December 2024- June 2025

- Creating a payment automation system to manage reimbursements.
- Using React with Vite framework to create a digital solution.
- Collaborating with team members to deliver a fully functioning product.
- Continuous testing and code reviews to provide a standard product.
- Using different tools to host it on the web.

Technologies/Tools Used:

- Visual studio code (Vs.), Node.js, PostgreSQL, Vercel, Railway, GitHub, React with Vite.

Education:

- **Certificate in Software Engineering/Web development** - Refactory Academy 2024.
- **Uganda Advanced Certificate of Education (UACE)** – Kennedy Secondary School Kawuku 2021.
- **Uganda Certificate of Education (UCE)** – St. Joseph Centenary Secondary School Ndeeba 2018.
- **Certificate with fundamentals in React-UpGrad.**
- **Certificate with fundamentals in UI/Simplilearn**, Alison.
- **Certificate with fundamentals in Figma-Simplilearn**
- **Certificate with fundamentals with Canva-Simplilearn**

Languages:

- English (fluent)
- Luganda(fluent)
- Rutooro (intermediate)
